

A man and a woman are jogging on a wooden boardwalk that runs along a body of water. The man is wearing a white t-shirt and grey pants, while the woman is wearing a black sports bra and leggings. They are both smiling and looking towards the right. The background shows a lush green forest and a clear sky. The boardwalk has a metal railing. The overall scene is bright and sunny, suggesting a pleasant day for outdoor exercise.

Wow! Taiwan Project

Wow! Taiwan Project

Wow! Taiwan Project selects the most innovative and cutting-edge products and technology solutions from Taiwan. We aim to connect suppliers and buyers all over the world to do business.

Founded by TITA (International Trade Administration, Ministry of Economic Affairs) and implemented by CDRI (Commerce Development Research Institute), Wow! Taiwan Project has created a safe online D2B (Direct to Business) platform for buyers and suppliers to exchange and connect, ensuring business growth is guaranteed through customized services.

BIOTECH & HEALTHCARE SOLUTIONS

Combining biological science with aesthetic technology to promote holistic wellness. Our products and devices focus on personalized care, helping individuals maintain their physical appearance and internal health.

SOLUTION 1

BEAUTY AND HEALTH CARE DEVICE AND ACCESSORIES

Our professional-grade devices bring clinical-level beauty and therapeutic treatments into the home, utilizing precise technology to enhance aesthetic results and personal hygiene.

Company Profile

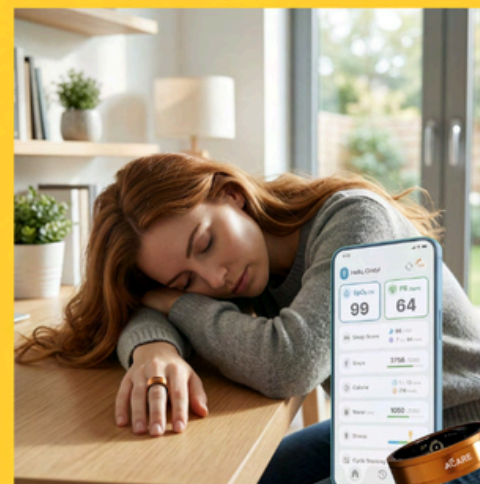

Acare Technology Co Ltd is a premium respiratory medical device manufacturer and a certified United Nations supplier. The exporter operates integrated design, R&D, and production teams serving over one hundred countries worldwide.

Core Expertise

The Innovation Smart SpO2 Ring delivers continuous sleep monitoring within a lightweight four-to-seven-gram architecture. This ring shape significantly reduces wearing discomfort compared to traditional clip-on pulse oximeters.

Sleep Monitoring & Cloud Analytics

This smart device tracks physiological trends via a dedicated mobile app and cloud encryption mechanism. It visualizes periodic history charts for SpO2, heart rate variability, daily step counts, and body surface temperature.

Company Profile

Hukui Biotechnology Co., Ltd. is a premier global MedTech CDMO leader established in 2013, leveraging ISO 13485-certified facilities across Taiwan, China, and the USA to accelerate medical device commercialization.

Core Expertise

Engineered for healthy aging, the innovative VitaShine™ Gamma Light Series deploys proprietary 40Hz gamma-frequency light technology to deliver a non-invasive, accessible approach for daily cognitive wellness and brain health support.

Global Market Traction

Secures high commercial potential with initial global shipments and distributor traction spanning Europe, the United States, and India, backed by Hukui's comprehensive global sales and channel development network.

Company Profile

ible Technology Inc. is an award-winning smart wearable pioneer, dedicated to engineering advanced, highly certified personal air purification solutions that safeguard daily health and environmental well-being globally.

Core Expertise

Presents Airvida T1, the world's first wearable air purifier with 30dB noise-canceling earbuds, generating 3 million negative ions/cm³ every 0.6 seconds to eliminate PM2.5, viruses, and allergens.

Award-Winning Market Leverage

Secures exceptional market trust through elite global accolades including CES Innovation Awards, German Innovation Awards, and four consecutive first-prize SNQ Epidemic Prevention Awards for unparalleled commercial credibility.

Aesthetic Enhancement

Precise Technology

Professional Home-Care

Company Profile

RED REHABILITATION CO., LTD., established in 2018, originates from a legacy 1984 bicycle parts manufacturer. The premium enterprise develops high-quality sports and medical rehabilitation assistance equipment for global markets.

Core Expertise

The SA -Balance Walker is an electric-assisted device engineered for standing and gait training. Featuring specialized hip harnesses, elbow supports, and silent casters, it seamlessly transitions individuals from sitting to standing.

Mobility Training & Safety

This walker integrates cushioned elbow areas and anti-fall hip harnesses to protect fragile users during physical therapy. Its adjustable, splayed base accommodates wheelchair widths, maximizing operational efficiency for clinical caregivers. It also extends under the medical bed to assist users in standing, walking, and moving from the bedside.

Professional Home-Care

Company

TBAL T-BAL Co., Ltd.

Company Profile

T-Bal Co, Ltd. is a pioneering next-generation dairy bioactive platform, leveraging patented separation technologies and advanced lipidomics to deliver high-performance nutrition and cosmetic solutions globally.

Core Expertise

Preserving an intact 40-to-200 nm triple-layer structure, the natural BALac Native Milk Fat Globule Complex (milk exosome) acts as a gastric barrier to ensure high absorption and superior bioavailability.

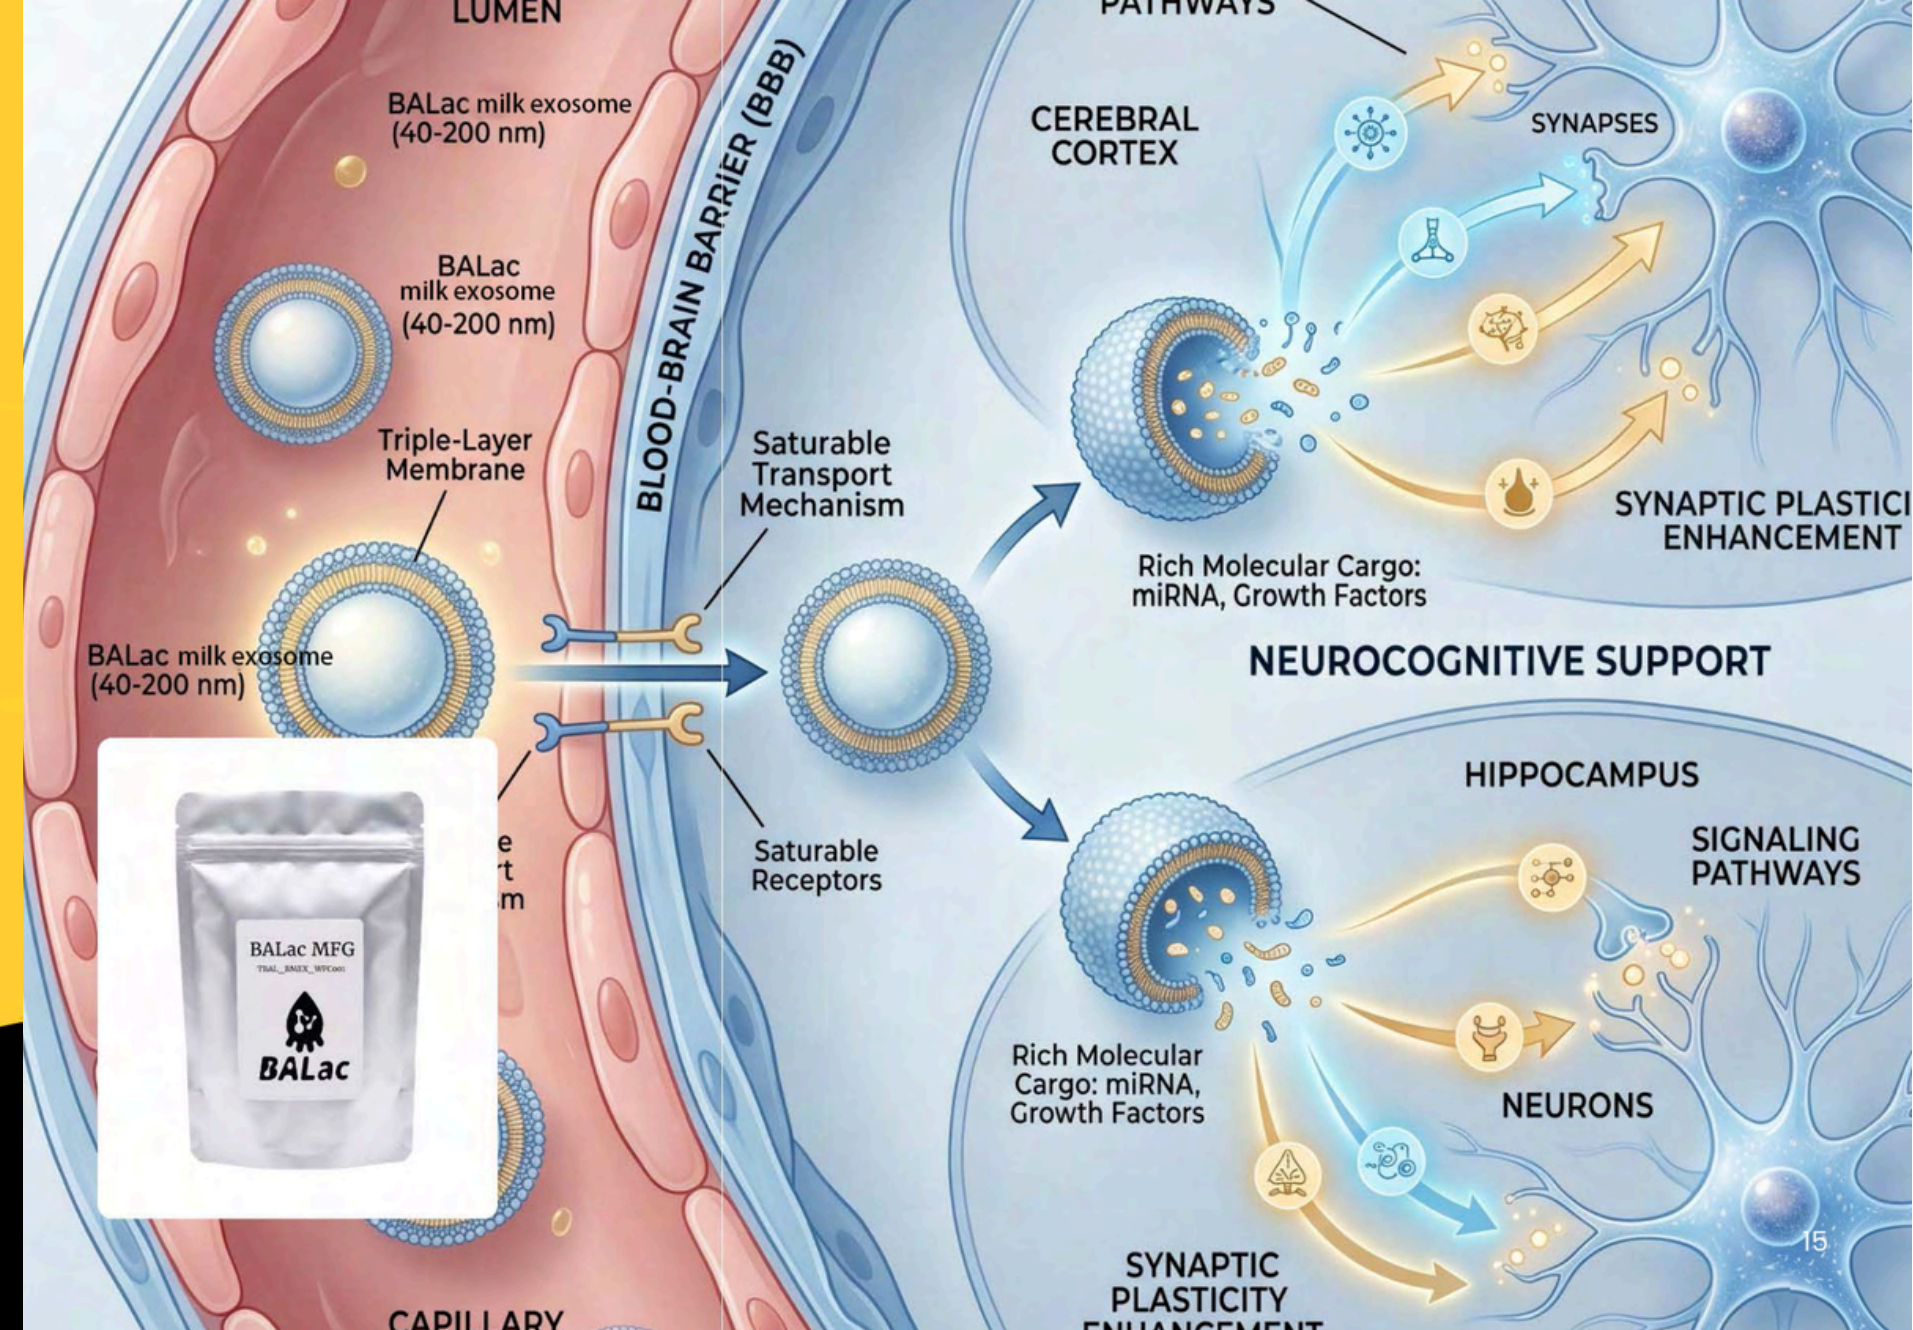

Elite Scientific Edge

Partners with Germany's Lipotype GmbH, deploying Max Planck Institute mass spectrometry technology to provide high-throughput lipidomics analysis, empowering global infant nutrition and premium skincare B2B collaborations.

Aesthetic Enhancement

Precise Technology

Professional Home-Care

Company Profile

UGYM Technology Corp. specializes in advanced electronic circuit development and high-frequency communication. The enterprise delivers innovative home stimulation and rehabilitation systems to capture individualized user habits and tracking logs.

Core Expertise

The UGYM POCKET IF5000 STIMULATOR integrates convenient pocket-sized hardware with programmatic electrotherapy modes. Featuring simple user interfaces, the portable device delivers both effective IFC and EMS muscle stimulation treatment. The first mode is 5000Hz same as hospital big Stimulator.

Portable Therapy & Cloud Tracking

This portable device delivers comfortable, effective physical stimulation while saving time and money. Powered by cloud data, it seamlessly uploads exercise rehab modules to enable remote medical professional follow-up.

Aesthetic Enhancement**Precise Technology****Professional Home-Care**

Company Profile

VitalSigns Technology Co., Ltd. provides connected cardiac monitoring solutions that integrate wearable ECG sensing, real-time transmission, and cloud-based clinical workflows to support scalable patient monitoring across hospitals, clinics, home care, and emergency care environments.

Core Expertise

Develops VitalSigns real-time ECG monitoring platform, combining a single-lead wearable ECG sensor, transmission hub, and cloud dashboard for continuous ECG waveform streaming, heart rate trends, HRV, body temperature, activity data, automated alerts, and remote clinical review.

Real-Time Cardiac Visibility

VitalSigns enables healthcare teams to access ECG waveforms and key physiological trends in real time, helping extend cardiac monitoring beyond traditional care units. By combining wearable sensing, wireless transmission, cloud-based dashboards, automated alerts, and structured reports, the platform helps care teams identify patient changes earlier and support scalable cardiac monitoring in emerging healthcare markets.

Company Profile

Well Lands Enterprise Co., Ltd. is an ergonomic polymer pioneer, running dual Taiwan and China factories with ISO 9001 and ISO 13485 certifications to deliver fully integrated manufacturing scalability worldwide.

Core Expertise

Engineered via high-tech low-friction fabrics to ensure a no-lift caregiving approach, the brand prevents lower back injuries and redistributes body pressure through its specialized AngelAid Assistive Devices.

Fully Integrated Sourcing Blueprint

Establishes a reliable sourcing blueprint by combining dual-facility high volume capacity with full end-to-end integration, spanning polymer procurement, injection thermoforming, PU pouring, and final certified assembly.

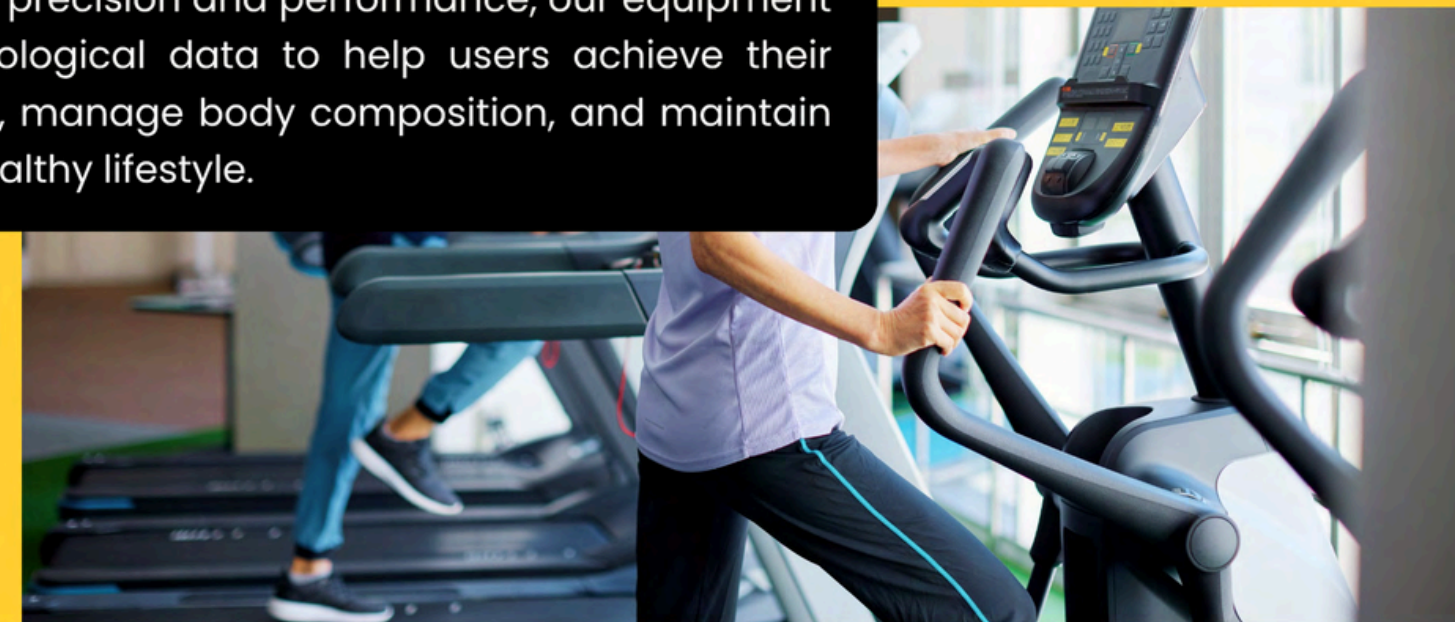

SOLUTION 2

A woman with long dark hair, wearing a light purple t-shirt and black leggings with a teal stripe, is running on a treadmill. In the background, a man in a black t-shirt and teal pants is also running on a treadmill. The gym has large windows and modern equipment.

FITNESS & BODY MANAGEMENT EQUIPMENT

Designed for precision and performance, our equipment tracks physiological data to help users achieve their fitness goals, manage body composition, and maintain an active, healthy lifestyle.

Company Profile

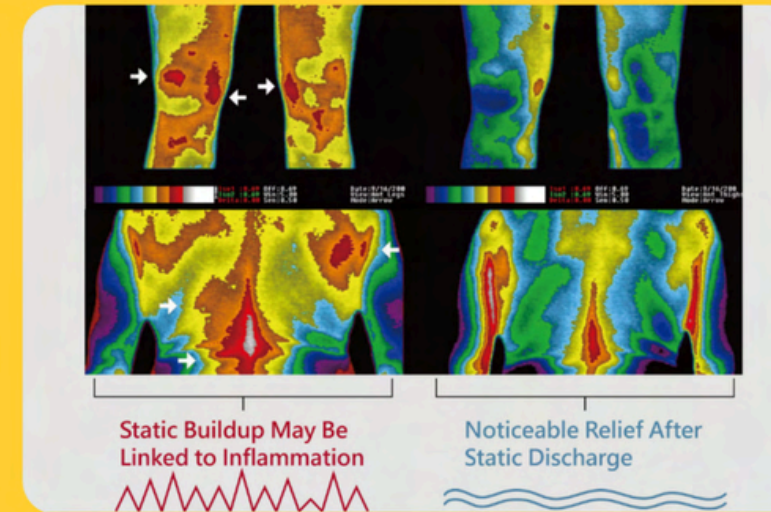

USTINI (HAKA CO., LTD.) is a global pioneer in patented earthing footwear with 30+ years of manufacturing expertise. The brand operates retail networks across medical centers and department stores.

Core Expertise

The Earthing Shoes incorporate unique structural patents in the US, Germany, and Japan to release bodily static electricity. This technology restores natural balance while ensuring ultra-lightweight, all-day comfort.

Ergonomic Relief & Mobility Support

Featuring a 360-degree full support design, these anti-fatigue shoes provide superior stability, arch support, and pressure distribution. They enhance long-term mobility safety, offering ideal professional ergonomics for healthcare specialists and aging populations.

Company Profile

Hermes Clues Industries Co., Ltd. is a premier manufacturer of advanced foam products, leveraging a powerful R&D team to deliver premium customized solutions for global fitness and healthcare markets.

Core Expertise

Engineered with a gentle acupressure surface and an ergonomic 9 cm support height, the brand offers balanced cushioning to ease neck muscle tension through its innovative Acupressure Touch-Hedgehog Relief Pillow.

Optimized Supply Chain Reliability

Ensures exceptional commercial satisfaction by integrating diverse material manufacturing partnerships with strict quality control, offering reasonable, market-competitive pricing and stable, on-time delivery for high-volume international sourcing.

Company Profile

Netown Corp., established in 2003, is a premier smart healthcare innovator integrating medical informatics, electronics, and cloud analytics to deliver intelligent data-driven health promotion solutions globally.

Core Expertise

Developing AI-powered muscle assessment, precision interactive training, group exercise solutions, and digital health platforms for personalized rehabilitation and wellness management.

AI-Driven Healthcare Excellence

Combining over twenty years of medical informatics expertise with AI and big data technologies to deliver scalable healthcare ecosystems for global healthcare providers and long-term care organizations.

Company Profile

SPINE ALINE Ltd. (GiMialign) is a next-generation sports medicine techwear brand holding invention patents across forty-three countries. The pioneer integrates anatomy, biomechanics, and textile engineering for daily musculoskeletal conditioning.

Core Expertise

The GiMialign Align-Kinetic Techsocks utilize a wearable external fascia system featuring directional elastic tension and precise anatomical anchor points. This biomechanical architecture triggers immediate neuromuscular activation and real-time posture self-correction.

Musculoskeletal Conditioning & Posture

Engineered to resolve foot arch dysfunction, this non-restrictive techwear successfully counters faulty biomechanics like flat feet. It actively guides deep muscle feedback during physical activity to restore natural bodily balance.

Aesthetic Enhancement

Professional Home-Care

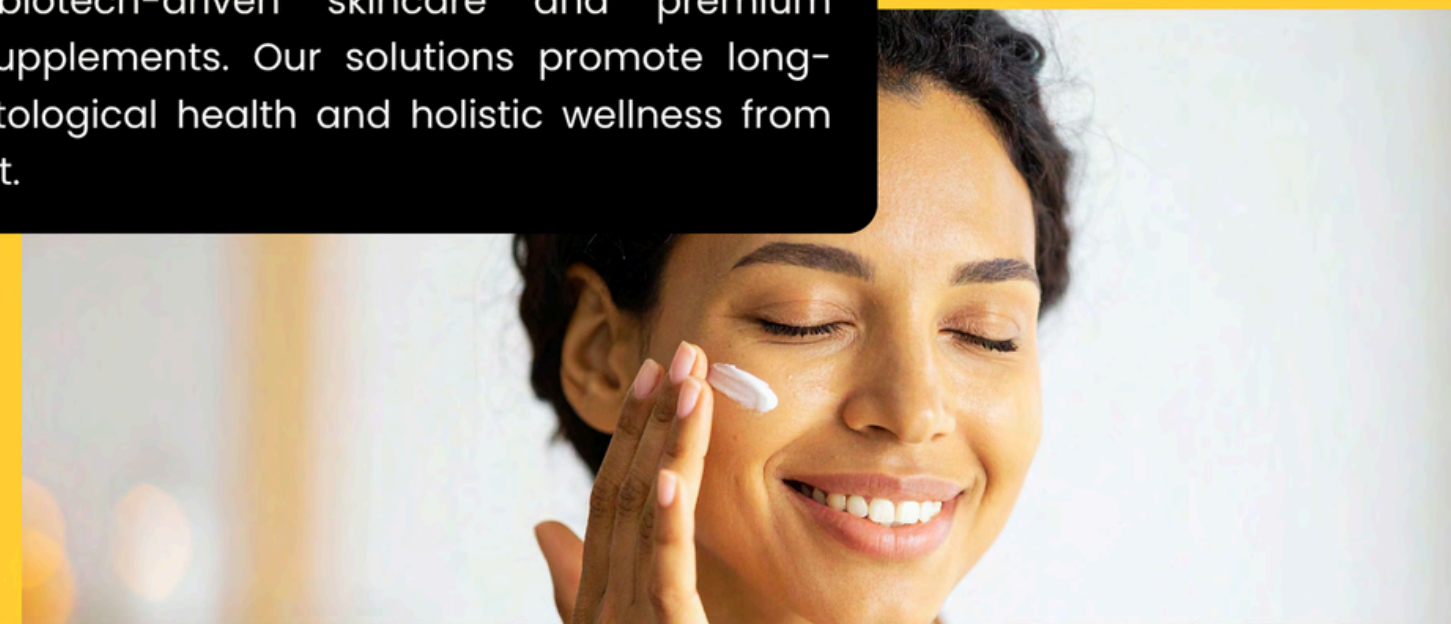

SOLUTION 3

A close-up photograph of a woman with dark, curly hair, smiling and applying a white cream to her cheek with her right hand. The background is a soft, out-of-focus light blue.

SKIN CARE & PERSONAL CARE

We offer biotech-driven skincare and premium nutritional supplements. Our solutions promote long-term dermatological health and holistic wellness from the inside out.

Company Profile

Anime Cosmetic Research Laboratories Co., Ltd., since 1995, is a clinical-grade OBM/ODM pioneer specializing in hypo-allergenic certified skincare, private labels, and advanced makeup manufacturing globally.

Core Expertise

Formulated to cosmeceutical standards to target sensitive, acne-prone, and dark-spot skin types, the brand delivers deep targeted repair through LA PEAU ANTIWRINKLE CREAM / LA PEAU AMINO CLEANSER MOUSSE.

Three-Decade Private Label Authority

Establishes a three-decade private label authority, leveraging professional research and development to deliver high-trust, tailored OBM/ODM cosmetic solutions that perfectly align with international market needs.

Company Profile

APROX Inc. is a professional OEM/ODM certified sock manufacturer driven by automated knitting technology. The enterprise delivers specialized material development, rigorous quality inspections, and sustainable international partnerships for over twenty years.

Core Expertise

The healthcare textile portfolio spans pressure five-toe socks, loose-fitting compression socks, and targeted anti-slip socks. These innovative designs efficiently isolate intertoe friction and provide customizable options for medical wellness brands.

Circulation & Fall Prevention

Engineered to promote blood circulation, this series utilizes progressive pressure to relieve varicose veins and plantar fasciitis. Its specialized anti-slip mechanics effectively prevent falls for home use, elderly individuals, and children.

Professional Home-Care

Company Profile

Biocrown Biotechnology Co., Ltd., established in 1977, is a premier Taiwanese cosmetic OEM/ODM leader, delivering high-quality, science-based skincare and personal care solutions to global markets.

Core Expertise

Introduces Customized ODM/OEM skincare/personal care products, featuring advanced ingredient selections and high-efficacy formulas developed specifically to meet target benefits with verified daily safety.

Certified Global Scalability

Maximizes market access via ISO 22716, ISO 14001, and HALAL certifications, deploying advanced cleanroom production to support flexible, market-ready scalability for both small and large batches.

Company Profile

BIOPTIK TECHNOLOGY, INC. is a publicly traded biotechnology innovator, leveraging premium, green facilities certified under ISO 22716, ISO 22000, and ISO 13485 to deliver globally trusted skincare and health supplement solutions. By seamlessly integrating biotechnology, health, and aesthetics, the enterprise nurtures comprehensive beauty from the inside out.

Core Expertise

Driven by an elite R&D team, our expertise is dedicated to custom-tailoring high-competitiveness products for our clients. Our core advantages span from the proprietary development of active ingredients (such as Astaxanthin and Hyaluronic Acid) to unique formulation research and strict safety validation. Our proven success in nurturing premium in-house brands, such as ACUREAL, serves as the ultimate testament to our R&D prowess and aesthetic excellence.

One-Stop Skincare OEM/ODM

Leveraging twenty years of profound contract manufacturing experience for international brands, we provide comprehensive skincare solutions and personal care wash series. Our premier one-stop services are fully compliant with international regulations. Within the global supply chain, we possess extensive export expertise, distributing products worldwide with a powerful market presence in Southeast Asia and the United States.

Aesthetic Enhancement

Product Information File Preparation

Company Profile

ExoVera BioMedical, established in 2023, develops premium plant-derived exosome ingredients with pharmaceutical-grade safety standards for cosmetic and nutraceutical applications, delivering innovative natural health and beauty solutions worldwide.

Core Expertise

Powered by advanced plant-derived exosomes, ExORei Gel and ExORei Capsules support cellular repair, skin regeneration, and overall wellness, providing highly bioactive ingredients for premium cosmetic and nutraceutical products.

Cross-Border Production Mastery

Our flagship ingredient is Ganoderma Exosomes, alongside a growing portfolio of specialized plant-derived exosomes. Partnering with leading OEM/ODM manufacturers in Taiwan and Japan, we provide comprehensive manufacturing services for cosmetic and nutraceutical products.

Company Profile

For You International Marketing Co. Ltd. specializes in comprehensive product marketing planning and global channel development. The exporter focuses on high-performance beauty solutions, actively promoting cross-border market exchanges.

Core Expertise

The BELDORA SKINCARE PRODUCTS portfolio represents the group's flagship brand tailored for international premium sectors. It combines boundless creativity with meticulous ingredient selection to deliver exceptional skincare routines online.

Premium Skincare & Runway Accolades

Recognized as the official skincare brand designated for Paris Fashion Week and New York Fashion Week, this clinically inspired collection empowers consumers to indulge in a life of absolute confidence.

Company Profile

Grape King Bio Ltd. is a leading Taiwanese biotechnology company with over 57 years of expertise. The manufacturer specializes in functional probiotic & mushroom mycelium ingredients and CDMO services for dietary supplements and inner beauty products.

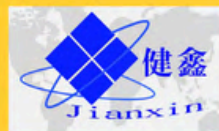

Core Expertise

The GK Exclusive Ingredients and ODM Services leverage a massive database of 4,000+ probiotic and mushroom mycelium strains. The facility operates 20 production lines spanning nine distinct supplement dosage forms.

Scientific Validation & Formulations

Driven by proprietary precision fermentation technology, this biotech portfolio delivers clinically proven efficacy for liver health, weight management, cognitive function, mental health, and metabolic wellness. Its custom flavoring optimization enables tasty, highly marketable global supplements.

Company Profile

JIANXIN BIOMEDICAL TECHNOLOGY CO., LTD., located in the Kaohsiung Science Park, focuses on advanced wound dressing R&D. The group operates complete quality systems incorporating academic insights to deliver safe, effective products.

Core Expertise

The Jianxin Silver-Gel Wound Dressing represents a transparent, shapeless wound-specific medical gel containing silver ions. This bio-compatible formulation utilizes targeted antibacterial properties to reduce severe wound infections efficiently.

Wound Care & Antibacterial Benefits

Engineered to provide a moist environment for optimal healing, this professional gel delivers more effective, convenient care routines. It successfully optimizes clinical outcomes for specialized patients suffering from diabetes and bedsores.

Company Profile

Jing Young Biotech Bussiness Co., Ltd. is a premier cosmetics manufacturer boasting dual GMP excellence, operating an ISO22716-certified facility with over 40 patent certificates to deliver premium global skincare solutions.

Core Expertise

Honored with the Monde Selection Gold Award, the oil-free Dr. L3 Moisturizing Emulsion deploys an exclusive patented Water Membrane Magnet ingredient to deliver rapid absorption and deep barrier hydration.

Full-Scale Patent & ODM Leverage

Leverages over 40 patents and CNS22716 compliance to provide high-trust, integrated OEM/ODM services spanning product development, budget planning, design, quality control, and international market trend insights.

Company Profile

JOYCOM BIO-CHEM CO., LTD. is an R&D-oriented enterprise holding twenty-two international patents. The HALAL-certified manufacturer delivers evidence-based personal care, innovative drugs, and premium medical devices globally.

Core Expertise

The VAGINNE[®] Gel-Patient Lubricant and Vaginal Douche Apparatus Set features an advanced Taiwanese patented formulation. This non-sterile routine moisturizer passes stringent vaginal mucous membrane irritation testing.

Microbiome Balance & Repair

Engineered around microbiome science, this specialized series suppresses pathogenic bacteria while protecting beneficial flora. It actively repairs vaginal tissues to soothe gynecological discomforts like itching and odor.

Company Profile

LUMMY BIOTECHNOLOGY CO., LTD. has developed high-performance scalp care solutions for twenty years. Utilizing an in-house research lab, the premium enterprise delivers safe, all-natural products to international markets online.

Core Expertise

The Saintfollow Hair Nutriment is a specialized hair nourishing liquid engineered for intensive scalp conditioning. Formulated with pure herbal extracts, the bio-active formulation successfully moisturizes and repairs damaged hair roots.

Scalp Health & Hair Volumizing

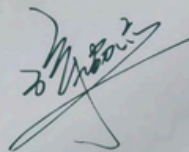

This natural remedy maintains strong hair roots to restore fullness and volume while enhancing shiny, lustrous hair appearance. The clinically backed solution promotes long-term scalp health and effectively combats thinning hair problems.

Company Profile

MacroHI Co., Ltd., founded in 2003, is a specialized scalp care ecosystem pioneer, combining over 60 years of technical heritage with a dedicated Green Cosmetics R&D Center.

Core Expertise

Engineered at pH 5.5 with amino acids, the 5α Juniper Scalp Purifying Liquid Shampoo deploys a 2% Glycyrrhetic Acid Complex for deep hair root cleansing and Cradle-to-Cradle Silver-certified sustainability.

Certified ESG Authority

Establishes elite commercial trust as Asia's first B Corp-certified scalp brand, securing BSI-verified PAS2060 carbon neutrality to empower global distributors targeting high-demand sustainable and ethical beauty retail channels.

Why Liquid?

Soften scalp buildups without irritating scalp

Company Profile

Milla International Ltd. is a premium sensitive skincare innovator, partnering with a renowned 30-year Taiwanese biotechnology pioneer to deliver exceptional product stability, root efficacy, and deep dermal healing worldwide.

Core Expertise

Engineered via a non-slip, skin-friendly hydrogel material that adheres seamlessly even during sleep, the brand delivers intense active nourishment to delicate eye areas through its Firming & Hydrating Eye Mask.

Certified Biotech Alliances

Secures immense global market competitiveness by combining a 30-year biotech co-development heritage with high-demand sensitive skin formulations, tailoring high-retention skincare solutions for premium international distribution channels.

Company Profile

MORITA BIOTECH CO., LTD. boasts over ninety years of excellence as a globally influential beauty brand. Supported by Sino-Japanese R&D teams, the group delivers high-standard quality management systems to twenty thousand worldwide points of sale.

Core Expertise

The comprehensive beauty portfolio includes PDRN Exosome Rejuvenating Serums, Royal Jelly Rejuvenating Creams, and Hyaluronic Acid Foaming Whips. These products integrate patented exosome technology and proprietary botanical ingredients for international markets.

Barrier Support & Cellular Repair

Engineered for aging care repair, this series targets dryness, visible fine lines, and weakened skin conditions. It delivers deep hydration to strengthen the skin barrier while resolving post-cleansing tightness and sensitivity discomforts.

Aesthetic Enhancement

Precise Technology

Professional Home-Care

Company Profile

Mystery International Co. (Glory Group) operates 30 premium spa centers and five medical aesthetic clinics, supported by its own in-house cosmetics manufacturing facility.

Core Expertise

With over 33 years of experience, Glory Group combines traditional body massage techniques, advanced medical aesthetic procedures, and anti-aging skincare with cutting-edge ingredients such as PDRN, PLA, and exosomes to meet the beauty and wellness needs of more than 50,000 clients.

Shulamite Cosmetics

Engineered to support healthier-looking skin, Shulamite's cosmetic formulations help improve the appearance of skin firmness, reduce the look of fine lines, and enhance the appearance of uneven skin tone. The products help improve the look of skin elasticity and promote a smoother, more radiant complexion.

Aesthetic Enhancement**Precise Technology****Professional Home-Care**

Company Profile

NiniKiki is a Taiwanese premium skincare brand dedicated to East Asian skin. Combining dermatological research, clean formulations, and refined aesthetics, we create skincare that supports long-term skin health.

Core Expertise

Professional formulations featuring trehalose, botanical ingredients, and skin-friendly technologies to deliver effective cleansing, lasting hydration, and everyday skin protection.

Why Choose NiniKiki

Every formula is thoughtfully developed for East Asian skin, combining scientific research, premium ingredients, and refined design to create skincare that balances quality, safety, and performance.

Aesthetic Enhancement

Precise Technology

Professional Home-Care

Company Profile

Pemay Biomedical Technology Corp. specializes in premium cosmetic and skincare OEM/ODM, advancing biotechnology and medical aesthetics to deliver high-performance, tailored manufacturing solutions globally.

Core Expertise

Features Future Glow Series, delivering an advanced, non-acidic exfoliating and brightening mechanism via Sangsicle Vitamin C and Brightening Cream to reduce pigmentation and smooth fine lines.

Patented R&D Leverage

Drives global market demands through customized product development and design, utilizing the latest international ingredients and patented formulations to ensure high-performance skincare innovation.

Company Profile

Sensui International CO., LTD. develops scientifically-backed probiotic microbiome skincare under the brand ELLÖ. Partnering with top manufacturers, the D2C enterprise ensures world-class, SGS-tested quality for global markets.

Core Expertise

The ELLÖ 6% Postbiotic Urgent Acne Cream utilizes advanced microbiome-balancing technology alongside a six percent dual-postbiotic blend. It combines salicylic acid and niacinamide for rapid skin clearing and blemish repair.

Microbiome Balancing & SOS Care

This gentle formula resolves severe peeling, dryness, and barrier damage associated with traditional harsh acne treatments. It acts as a fast-acting SOS spot treatment to calm sudden, large breakouts effectively.

Company Profile

Sisdora Co., Ltd. is a specialized medical cosmetology pioneer integrating complementary and general medicine, dedicated to advancing anti-aging solutions and deep clinical research across global professional markets.

Core Expertise

Infusing integrative medical aesthetics, the advanced SISDORA Exosome Graphene MASK targets microcirculation to effectively expand deep muscle microvessels, active cell mitochondria, and accelerate premium collagen production.

Clinical Hospital Alliances

Secures profound market credibility through over ten years of microcirculation R&D and strategic clinical research collaborations alongside prominent cross-strait medical cosmetology centers and traditional Chinese medicine hospitals.

Company Profile

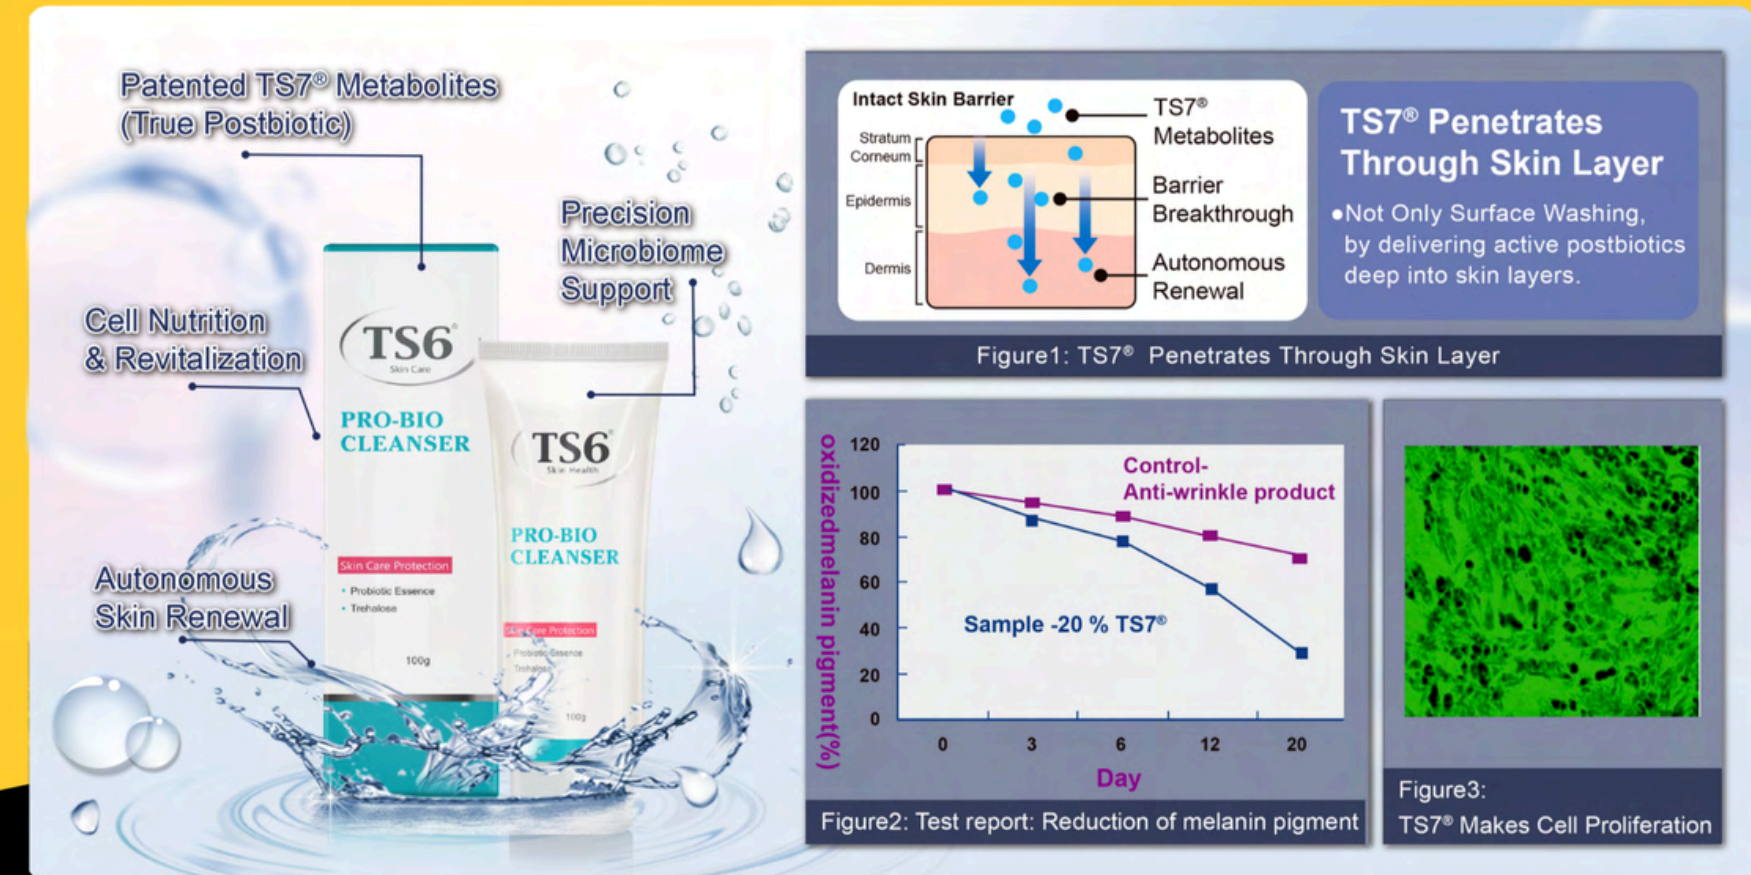

Tensall Bio-Tech is a pioneer in probiotic fermentation. We apply our proprietary bio-tech to create premium dietary supplements, feminine intimate care, and microbiome-friendly skincare formulas.

Core Expertise

Forget standard ferments. Our patented TS7® Probiotic Essence is a True Postbiotic derived from a 7-strain fresh milk process. It acts as a cellular guide, making your skin's autonomous ability to renew and rebuild.

Autonomous Dermal Rebuilding

TS7® provides skin not only with nutrients but also with extraordinary results. It actively boosts collagen support, speeds up natural cell renewal, brightens dark spots, and soothes sensitive skin.

Company Profile

TOP-WELL COSMETICS INDUSTRY CO., LTD., established in 1992, specializes in premium beauty OEM/ODM manufacturing. Holding certified GMP systems, the export-driven enterprise delivers reliable skincare product development to global partners.

Core Expertise

The BEAUTY CREAM collection by TOP-GEL benefits from thirty years of market experience and international OBM distribution. It features high-standard formulations carrying dual national quality management certifications from Taiwan and the UK.

Whitening Care & Global Standards

Engineered as an advanced whitening product, this professional skincare formulation targets deep skin maintenance across ten regions. It ensures an enjoyable, trustworthy experience to make users feel exceptionally healthy, relaxed, and confident.

Company Profile

Almiya, a subsidiary of Yongming Biomedical Technology, is a premium Taiwanese skincare innovator fusing advanced biomedical science with lifestyle aesthetics to deliver high-efficiency, safe, and precise dermal repair solutions globally.

Core Expertise

Introduces Almiya Timeless Elixir, an advanced serum leveraging patented Red Scorpion Peptide technology combined with Edelweiss and Fullerene to relax skin tension, smooth fine lines, and combat dullness.

Omni-Channel Market Agility

Deploys a robust OMO omni-channel and DTC strategy, utilizing data-driven consumer feedback and rapid product iteration to capture high-spending demographics while maintaining exceptional premium repurchase rates.

Company Profile

Yangsen Biotechnology, founded by National Yang-Ming University researchers, integrates Traditional Chinese Medicine with modern biotechnology. The company utilizes rigorous scientific validation to develop high-performance wellness solutions for global markets.

Core Expertise

The Five Elements Series features advanced meridian therapy oils verified via GC/MS spectrometry. Incorporating traditional herbal knowledge, these precise formulations actively target targeted physiological balancing across clinical applications.

Meridian Balancing & Wellness

Incorporating the Five Elements and meridian theories, this botanical portfolio alleviates specific sleep, digestive, and respiratory discomforts. The clean beauty solutions successfully boost immune support while promoting holistic wellness.
