Wow! Taiwan Project

Wow! Taiwan Project selects the most innovative and cutting-edge products and technology solutions from Taiwan. We aim to connect suppliers and buyers all over the world to do business.

Founded by TITA International Trade Administration, Ministry of Economic Affairs and implemented by CDRI (Commerce Development Research Institute), Wow! Taiwan Project has created a safe online D2B (Direct to Business) platform for buyers and suppliers to exchange and connect, ensuring business growth is guaranteed through customized services.

Beauty & Personal Care Solutions

Embracing wellness through natural and organic skincare, cutting-edge personal care innovations, and plant-based supplements. Enhance beauty routines while prioritizing health-conscious and sustainable living.

Solution 1

Skin Care, Personal Care

Prioritize radiant skin with gentle, plant-based skincare solutions and innovative personal products designed for daily rejuvenation and lasting comfort.

Glonoa Pharma, founded in 2018, develops patented fat-reduction solutions like Ronkyla® Injection—Taiwan FDA-approved for double chin treatment. With a focus on safety, innovation, and quality, the Ronkyla line aims to deliver effective, low-side-effect therapies that boost confidence and enhance quality of life.

Website <https://www.wowtaiwan.org/company/2655>

Ronkyla® Injection

Sodium Deoxycholate 10.56 mg/mL, 2 mL / Vial

- Ronkyla® (sodium deoxycholate) is a cytolytic agent indicated for improvement in the appearance of moderate to severe convexity or fullness associated with submental fat in adults (also called "double chin".)
- Prescription medicine. Ronkyla® should be administered by healthcare professional.

Glonova
Glonova Pharma Co., Ltd.
T-TOP Clinical Research Co., Ltd.

Mechanism of Action

Ronkyla®

(sodium deoxycholate) is a cytolytic drug, when injected into fat tissue, physically destroys the fat cell membrane causing lipolysis and the lipolytic substances eliminated through normal metabolism.

Ronkyla®

Adipocyte

Injection

Adipocytolysis

After Injection Day 1 Lipolysis

Macrophage infiltration, phagocytosis, and fibroblast recruitment

After Injection Day 2-28 Inflammation reaction macrophages clean up damaged fat cell

Exosomes Loaded with Bioactive Ganoderma Protein

ExRei®

Ganoderma microsporum: new species from Taiwan (1982)

- Unique Ganoderma variety found on willow stumps in Taiwan.
- Noted for significantly smaller spores compared to other Ganoderma species.
- Formal recognition in 1989 and documented in the Mycotaxon journal.

Immunomodulatory Protein Identified (2005):

- Employed bioinformatics and gene cloning techniques.
- Uncovered immunomodulatory protein unique to *G. microsporum*.
- Sets it apart from other Ganoderma varieties.

Innovative Ingredients and Technologies:

- Standardized production of immunomodulatory proteins initiated in 2009.
- Pioneering exosome purification technology developed in 2022.
- Resulted in the creation of **ExRei®**: exosomes loaded with bioactive Ganoderma protein.

Kingdom Fungi 真菌界

Phylum Basidiomycota 擔子菌門

Class Agaricomycetes 傘菌綱

Order Polyporales 多孔菌目

Family Polyporaceae 多孔菌科

Genus Ganoderma 靈芝屬

Ganoderma microsporum Hsue

INCI Name: Pichia/Ganoderma Microsporum Polypeptide-1 Extracellular Vesicles

Hsue PS, Chen ZC, Wang MH. *Ganoderma microsporum*, a new species on weeping willow in Taiwan. *Mycotaxon*. 2009; 98 (1): 35-40.
