Wow! Taiwan Project

Wow! Taiwan Project selects the most innovative and cutting-edge products and technology solutions from Taiwan. We aim to connect suppliers and buyers all over the world to do business.

Founded by TITA International Trade Administration, Ministry of Economic Affairs and implemented by CDRI (Commerce Development Research Institute), Wow! Taiwan Project has created a safe online D2B (Direct to Business) platform for buyers and suppliers to exchange and connect, ensuring business growth is guaranteed through customized services.

Sports & Health Solutions

Integrating advanced IoT wearables, high-quality sports equipment, and innovative functional textiles. Empower active lifestyles, optimize athletic performance, and promote overall wellness and comfort.

Solution 1

Fitness and Sports

Boost athletic performance and training effectiveness through ergonomically designed equipment and premium accessories crafted for active lifestyles.

WINGSPLUS INTERNATIONAL CO., LTD.

WINGSPLUS International has evolved from electronic fans to a trusted brand in personal rehabilitation and home healthcare. Our passive and active exercise equipment supports hand and foot mobility, ideal for seniors and post-surgery or stroke recovery. Durable, compact, and easy to use, WINGSPLUS products are widely adopted in hospitals, care centers, and homes. Designed for gentle yet effective rehab and daily training, we bring health, comfort, and mobility to users worldwide—empowering better recovery through movement.

SEDA G-Tech CO., LTD.

WhizToys is a modular, interlocking activity-sensing mat that can be assembled into various shapes, such as a basic 3×3 grid or an expanded 9×3 sports field layout. WhizToys connects to an app via Bluetooth, allowing users to engage in cognitive training, physical activities, competitions/cooperative games, and functional assessments simply by walking or stepping on the mat. The game app provides a multi-sensory experience through visuals, lights, and music. Caregivers or trainers can customize the game type and difficulty level based on the user's condition and abilities. Additionally, the app serves as a customizable game development platform, enabling modifications based on personal experiences and cultural backgrounds. The app also features account login functionality, storing gameplay results in the cloud for future evaluation and analysis.

■ Website <https://www.wowtaiwan.org/company/2663>

TEH-JOU SCIENCE AND TECHNOLOGY CO.,LTD

TEH-JOU's SMARTPONG TJ-3000BL is the world's most advanced table tennis robot, combining dual-core computing with a WiFi-enabled touchscreen for seamless operation. It delivers precise spin, elevation, and angle control across 81 customizable ball trajectories. With automatic, manual, and memory modes, it adapts to all skill levels—perfect for training and competition. SMARTPONG's intelligent design allows players to save preferred drills, cycle patterns, and fine-tune techniques. TEH-JOU leads global innovation in ping pong robotics with unmatched quality and responsive support.

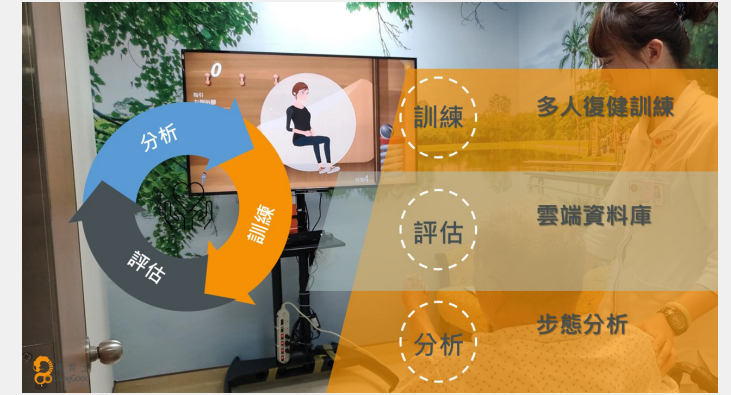

■ Website <https://www.wowtaiwan.org/company/2660>

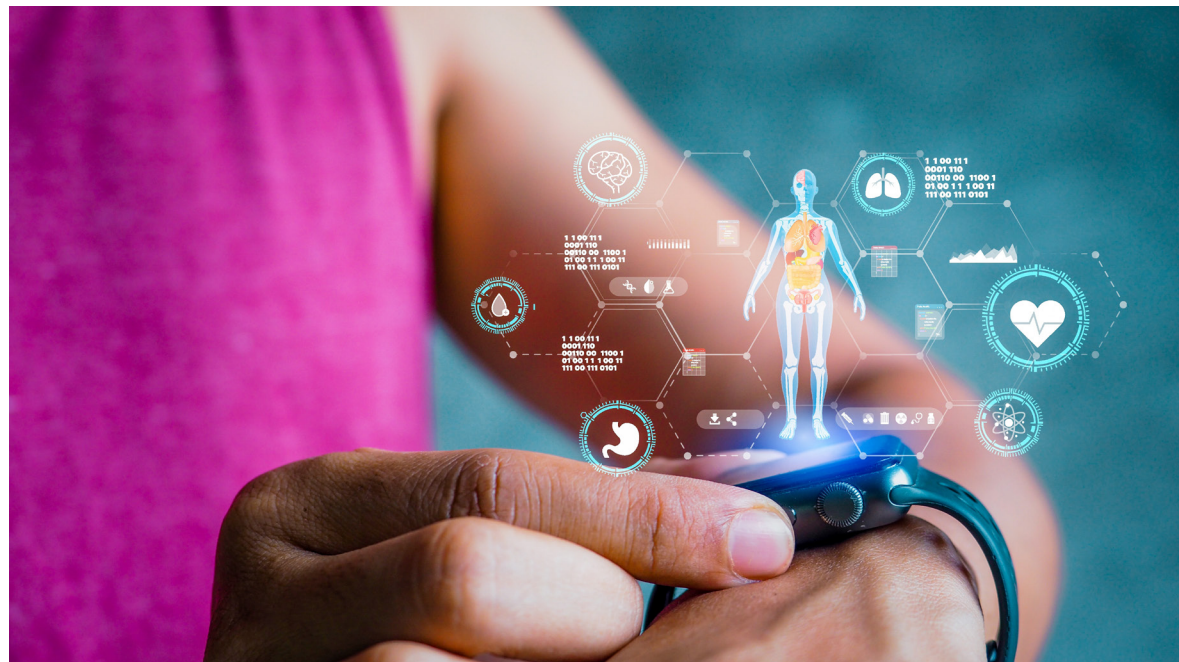

LongGood Meditech Ltd.

LongGood transforms rehabilitation with AI-powered motion sensing and digital therapy. Its rehabilitation system delivers AR-based training and data-driven evaluations, enabling remote care for patients and elders at home or in clinics. Used by 100+ institutions across Asia, LongGood boosts therapy access, especially for rural and mobility-limited patients. With 3D camera motion capture and therapist-designed algorithms, it empowers precise treatment, enhances motivation, and expands care capacity—bridging gaps in rehabilitation with smart, scalable, and effective solutions.

■ Website <https://www.wowtaiwan.org/company/2657>

Solution 2

Wearable

Track your fitness accurately with smart IoT wearables, optimizing health management through precise real-time data analytics and insights.

ible Technology Inc.

ible Technology delivers next-gen wearable protection with Airvida T1 — the world's first wearable ionic air purifier combined with noise-cancelling earbuds. This CES- and German Innovation Award-winning device releases 3 million negative ions/ cm³ every 0.6 seconds to remove air pollutants, PM2.5, pollen, and viruses. With over 50 global patents, Airvida T1 ensures clean air and immersive sound anywhere. Paired with the Airvida Connect app, users receive realtime air quality alerts. Stylish, portable, and health-focused, ible makes well-being wearable—anytime, anywhere.

UGYM Technology Corp.

UGYM Technology introduces the POCKET IF5000 Stimulator—an innovative, portable electrotherapy device combining TENS and EMS modes for pain relief and rehabilitation. Designed for home use, it logs time, intensity, and usage patterns, enabling cloud-based tracking for healthcare professionals. Compact, effective, and user-friendly, it supports fast recovery while minimizing clinic visits. Backed by award-winning R&D in high-frequency communication and circuit design, UGYM partners with global brands to deliver smart, data-driven rehab solutions that improve health outcomes anywhere, anytime.

Smartchip Microelectronics Corp.

SmartChip Microelectronics Corp. presents the REMOTEMED C1 Cardiovascular Tester — a compact, portable device that empowers individuals to monitor their heart health anytime, anywhere. In just 30 seconds, it captures I-lead ECG, SpO2, heart rate, and blood pressure trends, displaying results on its OLED screen or app. With real-time tracking and AI-powered insights, REMOTEMED C1 helps users recognize early signs of arrhythmia, tachycardia, bradycardia, and hypoxia. Designed for daily self-care, it's senior-friendly, non-invasive, and ideal for those seeking to manage cardiovascular health beyond the clinic. While not diagnostic, it offers crucial data for long-term tracking and medical consultations.

Website <https://www.wowtaiwan.org/company/2738>

VitalSigns Corp

VitalSigns Corp's ECG+Vitals™ Chest-Patch Monitor redefines wearable healthcare. This compact, wireless device captures ECG, heart rate, pulse, skin temperature, and posture in real-time—enhanced by AI-powered analytics for early arrhythmia detection. With its tri-band Universal Gateway, cloud SaaS platform, and motion artifact reduction, it enables continuous, clinical-grade monitoring at home or in hospitals. FDA-cleared and globally certified, VitalSigns empowers smarter, safer, and scalable telehealth care across patient journeys—delivering real-time insights and transforming chronic disease management.

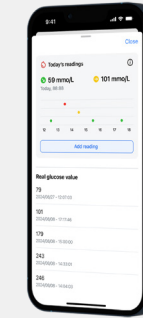

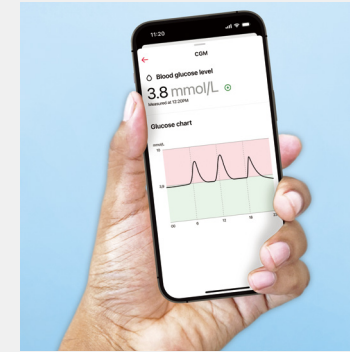

■ Website <https://www.wowtaiwan.org/company/2735>

Singular Wings Medical Co., Ltd.

Singular Wings Medical pioneers AI-powered, non-invasive health monitoring. Its BEATINFO Health system integrates ECG-based glucose tracking, arrhythmia alerts, and sleep apnea screening into one compact device—ideal for home and remote care. Backed by patented technology, cloud integration, and global recognition, the platform enables continuous, pain-free glucose monitoring and personalized health insights. Through SDK/PaaS services, it empowers telemedicine with real-time data for better chronic care, helping providers and users make smarter, lifestyle-driven health decisions anytime, anywhere.

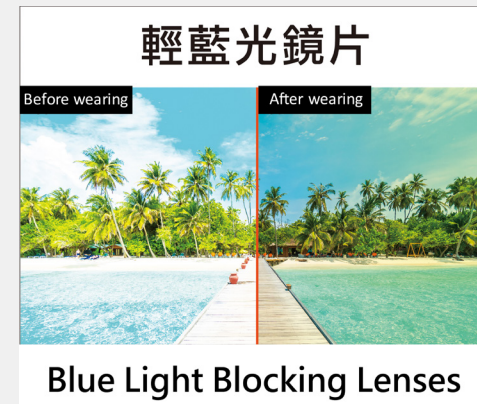

■ Website <https://www.wowtaiwan.org/company/2658>

ORIVER CO., LTD.

Oriver Co., Ltd., established in 1999, specializes in high-quality sunglasses and goggles made in Taiwan. Under the LAVA brand, we offer advanced filter lenses for macular degeneration, post-cataract care, blue light protection, and daily use. Our lenses reduce glare, boost contrast, and block harmful UV and HEV light. With ISO certification, patented designs, and global e-commerce reach—including Amazon—we combine in-house design, eco-conscious production, and medical-grade innovation to deliver eyewear that protects vision and enhances daily comfort worldwide.

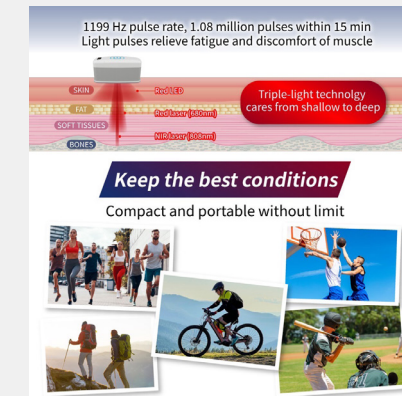

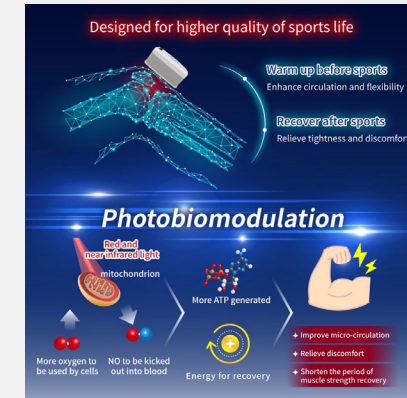

■ Website <https://www.wowtaiwan.org/company/2725>

Taiwan RedEye Biomedical Inc.

RedEye Biomedical pioneers optical health tech with RayFocus—a compact, FDA-registered low-level laser therapy device. Using red and NIR lasers, it targets joint and muscle pain, reduces inflammation, and promotes natural healing. Lightweight, wearable, and travel-ready, RayFocus fits key areas like knees and elbows with ease. Backed by science and patents, it's ideal for sports recovery, chronic pain, and daily relief. Experience effective, on-the-go therapy with RedEye's award-winning innovation in light-based rehabilitation.

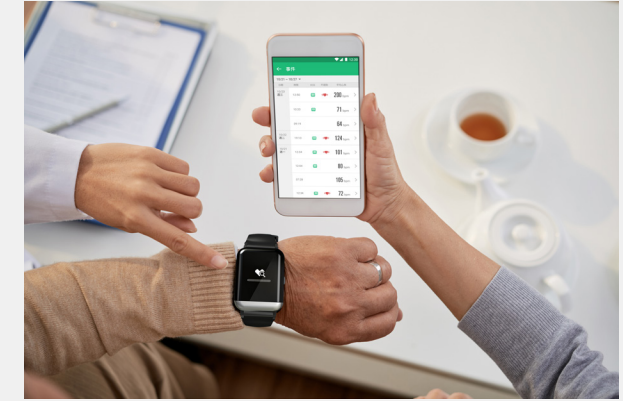

Website <https://www.wowtaiwan.org/company/2642>

LEADTEK BIOMED INC.

LEADTEK BIOMED INC. pioneers smart healthcare with AIoT-powered wearables and medical-grade monitoring devices. From ECG-tracking smartwatches to FDA-certified oximeters and turmeric pain relief patches, our solutions empower users with real-time health insights and pain management. Trusted by hospitals and 2,000+ retailers, our AMOR brand enhances heart, sleep, and chronic care. Backed by AI, patented tech, and global certifications, we deliver personalized, preventive healthcare for today's connected world—transforming health management at home and beyond.

Website <https://www.wowtaiwan.org/company/2621>

EcoHeal-TEC Co., Ltd

Ecoheal+ revolutionizes indoor air purification with patented PHIT technology—silent, filter-free, energy-efficient, and safe for all. Our air purifiers eliminate odors, bacteria, mold, and allergens while reducing harmful particles. From homes and hospitals to cars and commercial spaces, Ecoheal+ delivers customizable, eco-friendly solutions for healthier living. Operating 24/7 at just 10W, it's ideal for allergy relief and respiratory wellness. Backed by international certifications, Ecoheal+ is the next-generation purifier designed for human coexistence and smart air care.

DECOMPOSE HARMFUL GASES AND DEODORIZE THE AIR

The Design of the Photosynthesis E-Tree

"Nano-technology Level" air purification

According to the study of Department of International Health, more than 50% of the home environment exceeds the air quality standard of PM2.5, but what's even worse is that there are more than 90% of the home environment exceeds the European Air Quality Standard of PM2.5.

This means that there are many ultra-small pollution sources below 2.5 micron in our home. Compared to dust mites, and PM2.5 Particles, Formaldehyde, Tobacco (Cigarette smoke), Virus and Bacteria are even more terrible invisible killers.

Scalable Organic Compounds (VOCs)

Mold

Dust Mite

ZERO BLIND SPOT - PROACTIVE AIR PURIFICATION

Enjoy the forest-like clean air at home

Forest Bathing Experience - Enjoy the sense of comfort & cleanliness

Photosynthesis Hydrogen Ionization Technology (PHIT™) Air Purification System is an advanced proactive air purification technology.

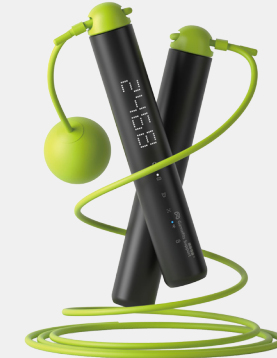

Under the action of wide spectrum UV light and various metal catalysts, the system produces PHIT purification factors including Hydrogen Peroxide ions, Hydroxyl ions, Superoxide ions, and Anions.

Through the air circulation, the PHIT factor actively combines with the indoor pollutants in the air, and a purification reaction occurs as in Forest Bathing.

J2-iTronic Taiwan Co., Ltd.

J2-iTronic Taiwan revolutionizes fitness with the SJ600 Bluetooth Smart Sensory Skipping Rope—the world's first to combine jump rope and super slow jogging. Featuring motion-sensing games and multiplayer interaction, it turns workouts into fun challenges. A nine-axis gyroscope and Bluetooth 5.1 ensure precise tracking for personalized training anytime, anywhere. Elevate your fitness, push your limits, and enjoy a smarter, healthier lifestyle with SJ600.

Solution 3

Sport Wear

Maximize comfort and performance with advanced functional textiles offering breathability, durability, and adaptive design for diverse sports environments.

Popular E-Commerce Co. Ltd.

WIWI, by Popular E-Commerce Co. Ltd., delivers advanced functional apparel made in Taiwan. Our Graphene Far-Infrared Thermal Wear combines cutting-edge yarn technology with far-infrared and trace element infusion to boost warmth, circulation, and comfort—raising body temperature by up to 7.2°C. Lightweight, moisture-wicking, anti-static, and stretchable, it's ideal for travel, outdoor activities, and daily wear. Backed by third-party certifications and a strong digital strategy, WIWI offers high-performance apparel with style and reliability, now expanding from Asia into the global market.

■ Website <https://www.wowtaiwan.org/company/2708>

HAKA CO., LTD.

USTINI is a Taiwanese brand dedicated to health-conscious footwear innovation. Our patented Earthing Shoes and Earthing Socks discharge static electricity from the body to support natural balance and relieve fatigue—ideal for people who stand or walk for long hours—such as healthcare professionals, retail workers, service staff, travelers, and active seniors. Ultra-light (120g per shoe) and 360° arch-supported, USTINI footwear is sold in 50+ stores across Taiwan, including our own branded stores, department stores, and hospitals. Backed by 30+ years of expertise and patents in Japan, US, Germany, and Taiwan, USTINI offers export-ready footwear designed for comfort and health.

Benefits of Static Discharge

During exercise, excess static buildup may disrupt your body's natural balance. You can help reduce this with static discharging support:

1. Release built-up static electricity
2. Absorb free electrons from the earth to help maintain natural balance

Before:
When the body is charged with static
Clusters of Red Blood Cells

After:
After static discharge

ECHO METALART CO., LTD.

ECHO METALART brings 40 years of buckle craftsmanship and innovation to the golf world with its GREEN Golf Belt series and accessories. Made 100% in Taiwan, our golf belts feature automatic buckle adjustment and a built-in ball marker for seamless play. Designed with precision and style, they combine fashion and function—perfect for golfers of all levels. From belts to ball bags and pen holders, our premium-quality metal accessories are trusted by clubs and teams worldwide and available on global platforms.

■ Website <https://www.wowtaiwan.org/company/2718>

Lisa Everfashion Corp.

Lisa Everfashion Corp. promotes eco-conscious innovation through its brand XiongHao Moda T. Bear, combining Taiwanese creativity with sustainability. We offer certified biodegradable materials and products—both foam and non-foam—made from natural plant starch. These non-toxic, compostable solutions decompose naturally and meet ISO, HACCP, SGS, and BPI standards. Our eco-foam rivals PU in toughness and is ideal for shoes, packaging, and marine uses. From cups and cutlery to custom packaging, we deliver stylish, safe, and sustainable alternatives that protect both people and the planet.

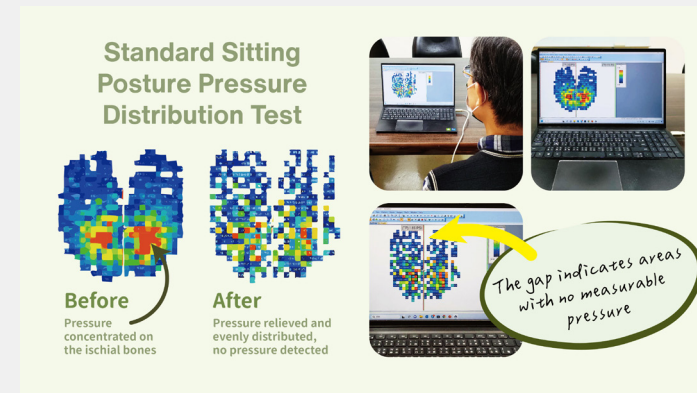

Website <https://www.wowtaiwan.org/company/2712>

Biofast Biotech Originality Study Co., Ltd.

Biofast Biotech is a pioneer in medical-grade gel innovation and is well-known for its ExpertGel brand. The Energy Meditation Stretch Mat uses a patented mortise structure to provide sciatic pressure relief and stabilize the meditation posture during meditation. The special breathable design can continuously dissipate heat and also relieve the knees from burden when used for stretching exercises. It is worth mentioning that the bionic material spring gel is added with natural essential oils and energy-conducting substances. This product will bring users an extraordinary new experience.

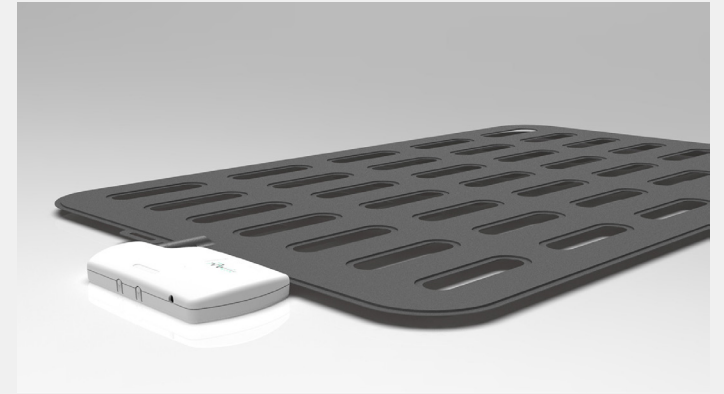

■ Website <https://www.wowtaiwan.org/company/2716>

Foreaider Co.,Ltd

Foreaider simplifies caregiving with the Smart Sensing Pad—a contactless, plug-and-play solution placed under any mattress. Using bio-microvibration technology, it detects heart rate, breathing, bed presence, and movements without disrupting comfort. Caregivers receive instant alerts via app or web if abnormalities or bed exits occur, enabling timely intervention and fall prevention. With no electronic components on the surface, it's foldable, durable, and easy to maintain. Foreaider empowers safer, smarter eldercare through real-time health monitoring and intuitive, non-intrusive support.

Website <https://www.wowtaiwan.org/company/2692>

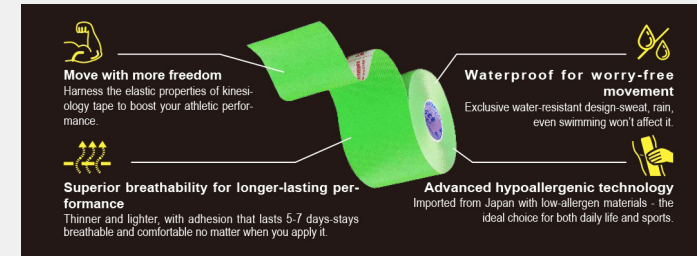

ALDA TECH CO., LTD.

ALDA Tech, under the Shen Ying Tai Group led by Olympic icon Chi Cheng, pioneers sports medicine innovation in Taiwan. We offer medical-grade kinesiology tape widely used in global competitions, enhancing performance and aiding recovery without medication. Our ALDA Health Far-Infrared Therapy Unit penetrates deep tissues to boost circulation, metabolism, and cellular regeneration—ideal for pain relief and wellness. Through STR platform integration, we combine training, products, and care to advance athlete health, injury prevention, and long-term performance.

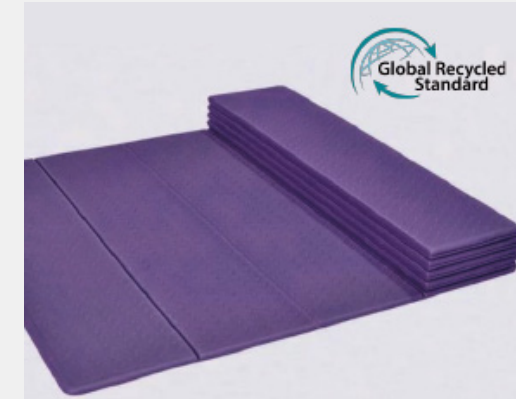

Website <https://www.wowtaiwan.org/company/2683>

Innonyx International Co., Ltd.

Innonyx provides microreactor technology and sustainable materials such as recycled PVB and bio-based nylon PA56, driving green innovation. As a GRS-certified supplier, we offer a long-term supply of high-quality recycled plastics and traceable eco-friendly materials, helping partners achieve their sustainability goals and accelerating the transition to Chemical Industry 4.0 and a low-carbon circular economy.

■ Website <https://www.wowtaiwan.org/company/2654>

Hermes Clues Industries Co., Ltd.

At Hermes Clues, we don't just supply yoga and fitness products — we co-create them.

Specializing in foam-based wellness tools, we partner with global clients to design, prototype, and deliver custom solutions that meet real needs. With expertise in OEM & ODM, we bring ideas to life with a focus on sustainability, performance, and speed. From concept to shelf, we make it easier to launch standout products.

■ Website <https://www.wowtaiwan.org/company/2659>

EVA Foam Industry

EVA Foam Industry, with 20+ years of expertise, offers premium EVA, TPE, and NBR foam products including yoga blocks, mats, and sports gear. Trusted by major UK clients, we provide flexible ODM/OEM solutions with a focus on quality, innovation, and reliable global service. Your best partner for foam-based wellness and fitness products.
